

# BLOSS

OVERVIEW

PLANTERS SYSTEM  
SISTEMA DI FIORIERE  
PFLANZGEFÄSSE-SYSTEME  
SYSTÈME DE JARDINIÈRES

# Overview

Reinvent your space. Experiment with your garden. Create your own personal garden architecture. The possibilities are endless with BLOSS. System of stainless steel planters rich in design for private and public outdoor spaces as well as for indoor use.

BLOSS is designed to effortlessly create defined, soft, graceful or graphic forms. To achieve unique creations whilst combining the different modules available. Or to create concealing walls and dividing structures. A smart system due to the versatility of its 300 modules and numerous accessories.

Additional components such as trellis for climbers in stainless steel, available in the same shade as the planters, in addition to planters transformed into storage chests, complete the item down to the last detail for your green areas and outdoor spaces.

Reinventare lo spazio. Giocare con il verde. E creare la propria personale architettura dei giardini. Le possibilità sono infinite con BLOSS. Sistema di fioriere in acciaio inox ad alto contenuto di design per spazi outdoor privati e pubblici e anche per utilizzo indoor.

BLOSS è progettato per comporre a piacere forme nitide, morbide, sinuose o grafiche. Per realizzare vere e proprie installazioni, accostando fra loro i diversi moduli a disposizione. O per costruire pareti di mascheramento e strutture divisorie. Un sistema intelligente e versatile grazie ai suoi 300 moduli e i numerosi accessori.

Componenti aggiuntive come i pannelli grigliati per rampicanti in acciaio inox, disponibili nelle stesse nuance delle fioriere, e le fioriere trasformate in pratici contenitori permettono di completare in tutti i dettagli l'arredo di spazi verdi e dehors.

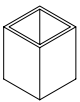

Den Raum neu erfinden und mit dem Grün spielen. Und eine ganz persönliche Gartenarchitektur erschaffen. Mit BLOSS sind die Möglichkeiten uneingeschränkt. Das Pflanzgefäße-System aus Edelstahl mit dem hochwertigen Design für private und öffentliche Bereiche im Freien, aber auch in Innenräumen.

BLOSS wurde geplant, um ganz nach Geschmack klare, weiche, gewundene oder grafische Formen zusammenzustellen und durch das Aneinanderreihen der verschiedenen verfügbaren Einzelteile regelrechte Anlagen zu verwirklichen. Oder um Verkleidungen für Wände und Trennvorrichtungen zu erstellen. Dank seiner 300 Module und der unzähligen Zusatzteile ist es ein sehr intelligentes und vielseitiges System. Zusätzliche Bestandteile, wie Rankgitter aus Edelstahl für Kletterpflanzen, die in den gleichen Farbnuancen der Blumenkästen verfügbar sind und die in praktische Behälter umfunktionierten Blumenkästen ermöglichen es, mit den weiteren Teilen unseres Lieferprogramms die Ausstattung der Grünflächen und der Außenbereiche zu vervollständigen.

Réinventer l'espace. Jouer avec le vert. Et créer une architecture personnelle des jardins. Les possibilités sont infinies avec BLOSS. Système de jardinières en acier inox hautement design destinées aux environnements extérieurs privés et publics, mais aussi à l'intérieur.

BLOSS a été conçu pour composer des formes nettes, douces, sinueuses ou graphiques, au choix. Pour réaliser de véritables installations, en associant les différents modules disponibles. Ou pour construire des protections visuelles et des séparations. Un système intelligent et polyvalent grâce à ses 300 modules et de nombreux accessoires.

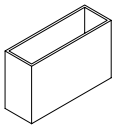

Des composants supplémentaires comme les treillis pour plantes grimpantes en acier inox, disponibles dans les mêmes coloris que les jardinières, et les jardinières transformées en récipients pratiques permettent de compléter dans les moindres détails l'aménagement d'espaces verts et extérieurs.
